RIVERBOAT GAMBLERS TO THE CONFUSION OF OUR ENEMIES

Volcom Records

Hell yes! I knocked three people down to get to the stereo when this arrived. I do confess however that this review is going to be a big tease for everyone—"Confusion" isn't in stores until April 26. The RG are from right here in A-town, Tejas, by way of the musical goldmine Denton. These guys built themselves a rabid following by relentless touring and an out of control stage show. I can't really classify them, but their music is a 200 proof chemical cocktail that is equal parts rock and punk. They're just an amped-up thrill ride that's just a flat out good time. Hell,

they're a nationally touring band from Texas, you guys should know them by now! "Confusion" is superbly produced by the legendary Mudrock, and takes its moniker from Frank Sinatra's favorite hell-raising toast, oddly enough. If you crave music that gets the blood pumping, this is mandatory.
