**VALIENT THORR**  
"LEGEND OF THE WORLD"  
**GRADE- B+**  
(Volcom)

Valient Thorr is from Venus. They are going to save the planet Earth. Or at least they would like us to believe that. And to think I almost mistook them for a joke metal band like The Darkness or Disturbed. *Legend of the World* is a bit strange at times but there is no denying that it contains kick ass rock and roll. *Legend* is full of raw guitar riffs, classic rock vibe and political attitude. I feel much better now that Valient Thorr has

arrived from Venus to save the planet with rock and roll. Now let's see if they can save this year's hurting Warped Tour line up.
