Pepper: To Da Max

This is a compilation of recordings from 1997 through 2005, all of which have never been released. If you're a fan of Pepper or dub/rock this is pretty much an essential. Some of the takes are from live performances, and some are just recordings that have never been released until now. It spans back to the Kona days, and there's a little of everything from different albums. It's good and a little hazy, and I mean that

it the best possible way. Here's what you can do for fun this summer. Go buy this album and a case of cold ones, call some friends and press play. Viola, an instant party. (Volcom Ent.)
